Everman ISD

A personalized guide to understanding your Critical Illness coverage

CRITICAL ILLNESS INSURANCE

Benefit Summary

What is Critical Illness Insurance?

This coverage pays a lump-sum benefit following the diagnosis of a critical illness, such as a heart attack, cancer or stroke. It can help protect you and your family from the financial challenges that can come from a critical illness.

Use your benefits any way you like.

Benefit proceeds can be used however you want, whether it's toward your medical bills, student loans or child care expenses. It's up to you.

Who can be covered?

The coverage offered by your employer allows you to cover yourself, and your spouse and children. Note that you may only cover other family members if you are insured by this coverage yourself.

Approximately every
40 seconds
an American will have a heart
attack.¹

Each year in the United
States, more than
1.6 million people
are diagnosed with
cancer.²

24 million
people or 10% of
adults are carrying
debt from medical
expenses that they had
to pay out of pocket in
the past year.³

What's the difference between health insurance & Critical Illness Insurance?

Health insurance covers medical expenses and pays your provider directly but may leave you responsible for some out-of-pocket costs. The amount paid depends on your coverage, the type of care and whether you've hit your out-of-pocket maximum.

Critical Illness Insurance is supplemental coverage that can complement your health insurance and help cover your out-of-pocket expenses. The benefit amount is based upon the diagnosis of a critical illness, is paid to you directly and can be used however you like.

Let's say you carry health insurance and Critical Illness Insurance, and you go to the hospital, where you are diagnosed with having had a stroke. Your health insurance will pay the treating providers for some or all your medical expenses. Your Critical Illness Insurance will pay you a lump sum directly that can be used however you like. You could put it toward uncovered medical expenses, like co-pays, or use it to cover your rent, or to replace lost income during treatment or recovery.

Coverage highlights:

- No health questions asked
- Select the coverage amount that fits your life
- Affordable premiums
- Convenient payroll deductions
- Simplified claims-filing with dedicated support
- If you leave your employer, you may be able to take your coverage with you at the same rate

23% of Americans report forgoing one or more types of health care in the past year due to affordability.³

\$20,246
Average cost of a heart attack.⁴

Alzheimer's disease affects about **5.7 million Americans**.⁵

How does it work?

The amount paid is based on the benefit amount you elect from the chart below. Critical Illness benefits are paid for the initial occurrence, reoccurrences of the same critical illness and occurrences of a different critical illness, up to the elected maximum payment. There is no wait between initial occurrences and different critical illnesses. Reoccurrences of the same critical illness can be paid 3 months after the initial critical illness. Check your benefit schedule for more details around the covered critical illnesses.

BENEFIT SNAPSHOT: AMY'S HEART ATTACK

Critical Illness Insurance coverage: Base coverage with unlimited maximum payout
Benefit amount elected by Amy: \$30,000.00

As a longtime runner and yogi, Amy was in great shape, which is why she never expected to have a heart attack at the age of 48. Amy was even more surprised when she had a second heart attack the following year, at which point she underwent coronary artery bypass.

Fortunately for Amy, she'd enrolled in her employer's Critical Illness plan. Having these benefits helped offset the medical bills not covered by insurance, cover her regular bills and replace lost income during her recovery.

Amy's Critical Illness policy provided these benefits:

First occurrence:	\$30,000
Reoccurrence:	\$30,000
Coronary artery bypass:	\$7,500
Total benefits paid:	\$67,500
