

Disability insurance

Short term disability

Disability insurance covers a part of your income, so you can pay your bills if you're injured or sick and can't work.

Disability is more common than you might realize, and people can be unable to work for all sorts of different reasons. In fact, many disabilities are caused by illness, including common conditions like heart disease and arthritis. However, most disabilities aren't covered by workers' compensation.

Who is it for?

If you rely on your income to pay for everyday expenses, then you should probably consider disability insurance. It ensures that you'll receive a partial income if you're injured or too sick to work.

What does it cover?

Most disability insurance plans pay out a portion or percentage of your income if you're diagnosed with a serious illness or experience an injury that prevents you from doing your job.

Why should I consider it?

Accidents happen, and you can't always anticipate if or when you'll become sick or injured. That's why it's important to have a disability policy that helps you pay your bills in the event of being unable to collect your normal paycheck.

You will receive these benefits if you meet the conditions listed in the policy.

Replacing Income

Mike injures his back bicycling and can't work or earn a paycheck for a few months.

After a brief waiting period, his disability plan starts paying him a portion of his normal weekly salary. The Guardian policy also provides personal guidance and support, including vocational rehabilitation and outplacement services, to help him get back to his job and full pay 13 weeks later.

Thanks to Mike's disability benefits, he was able to cover his expenses while he was out - without dipping into his family's savings.
