

## RationalMed®

RationalMed® is an Express Scripts advanced Health Choices solution that improves clinical and financial outcomes by integrating and evaluating medical, pharmacy, and lab data to identify critical, actionable health and safety issues and gaps in essential care, and then direct effective outreach to physicians, pharmacies, and patients. RationalMed looks at [Client]’s total population, not just those patients with chronic and complex conditions. This clinical safety program helps prevent unnecessary and costly hospitalizations, adverse events, and addresses gaps in essential care — all with no disruption for [Client]’s members and guaranteed savings for your plan.

Evidence-based, pharmacy-related standards of care are communicated to drive positive changes in physician behavior in response to potential safety concerns and gaps in essential therapy, testing, and suboptimal medication adherence. RationalMed focuses on the most important safety concerns across all disease states — including pulmonary, endocrine, renal, urinary, and cardiovascular disorders.

Express Scripts’ RationalMed safety program offers more than 20 years of experience and has a proven track record of improving clinical and financial outcomes. RationalMed supports member safety and helps to lower your plan’s healthcare costs.

### Benefits

RationalMed offers the following benefits:

- Protection for your entire population, including covered dependents, against thousands of evidence-based drug risks
- Extra safety to your members and extra savings for your plan:
  - Effects evidence-based changes in therapy and treatment through proven interventions
  - Ensures real-time access to actionable data
  - Offers transparent outcomes methodology so you can be confident about your return on investment (ROI)
- Integration with your other Express Scripts and health management solutions to enhance care coordination
- Improved clinical and financial outcomes with high physician and patient satisfaction
- Ability to leverage medical claims data to enhance other PBM services
- No financial risk — we guarantee annual pharmacy savings alone will equal or exceed program cost
