WHEN YOU CAN CHOOSE YOUR BENEFITS

1 When You Are Newly Hired

To get you started with a TML Health plan, please make your plan selections to enroll within 31 days of your hire date or within 31 days of the date your coverage is effective — whichever date is later.

2 During Open Enrollment

Each year you have the opportunity to review your current benefits and make changes including benefit choices and/or adding/dropping dependents. Changes made during open enrollment will be effective on the plan's effective date. If we don't receive your changes within the open enrollment period, you will not have coverage for the upcoming plan year.

When you enroll during the correct time period, your coverage will begin during one of these dates — whichever is later:

1. The date you became an active employee working at least 20 hours per week.
2. The date you complete any waiting period established by your employer.
3. The Anniversary Date of your plan following your Open Enrollment period.

3 When You Have a Qualifying Life Event

Sometimes an event, such as a marriage or birth, may mean you need to change your benefits during the plan year.

The following are qualifying life events that allow you to make changes to your benefits during the plan year.

- Marriage
- Divorce
- Birth or adoption of a child
- Placement of a foster child in your family
- Death
- Change in Medicare or Medicaid eligibility status
- Loss of State Children's Health Insurance Program (SCHIP), but not gain of SCHIP benefits
- Significant change in the financial terms of health benefits provided through a spouse's employer or another carrier
- Unpaid leave of absence taken by employee or spouse
- Spouse, dependent, or both gains or loses coverage through employment

You must submit your enrollment within 31 days of the date of the life event (60 days for a birth/adoption). If you qualify, your coverage will start on the date the life event took place. You will also be responsible for any payroll deductions associated with the change.

Copayment DEFINITION

Also called a “copay,” this is the fixed dollar amount (not a percentage) you will pay for a certain kind of medical service under some plans.

It is important for you to understand who can and cannot be considered a dependent on your plan. Documentation is required to support the eligibility status of each of your dependents. PRESCRIPTION DRUG PLAN

The prescription drug plan included with your medical benefits is managed by Navitus and uses a network of participating pharmacies. To receive benefits, you must use a participating pharmacy.

Using Your Prescription Drug Benefits

You can get your medicines from either a retail network pharmacy or through the Navitus mail order program. To make the most of your savings, we encourage you to ask for a generic medicine whenever possible. Generic medicines must meet the same FDA safety requirements as more expensive medicines to treat the same condition.

Wellness Drugs for Members with High Deductible Health Plans

If you are enrolled in the High Deductible Health Plan, certain wellness drugs (for prevention, rather than treatment) are only subject to prescription copays. Non-Wellness drugs are subject to the In-Network deductible. Once the In-Network deductible is met, prescription copays will apply.

Refer to your Summary of Benefits & Coverage (SBC) to determine which Plan design applies.

Prior Authorization

Some medicines have to be approved (authorized) by a doctor before you can start them. The reason is because some medicines are only approved or effective for certain health conditions. Prior authorizations help manage costs, control drug abuse, and protect your safety. They give you a chance to have the best possible treatment outcomes.

As part of this process, a group of doctors and pharmacists meet often to review medicines that are part of prescription drug plans. They also recommend prior authorization guidelines.

To start the prior authorization process:

- You, your pharmacist, or your doctor will contact us.
- We'll work with your doctor to get the information that's needed for the review.

For more information, call Navitus Customer Care at **855-673-6504**.

Disease Management Maintenance Drugs

Certain generic Disease Management Maintenance Drugs are offered at \$0, including medications for hypertension, high cholesterol, and diabetes.

You can see a complete list of eligible medications by logging in at tmlhealthbenefits.org.

Step Therapy

Most health conditions can be treated using various medicines. Although they may work in much the same way, their prices can vary quite a lot. With the step therapy program, you can still get the treatment you need — often at a lower cost.

Here's how the step therapy program works:

- You'll try a **Step 1 medicine** *before* a **Step 2 medicine will be covered**.
- That means you'll try a less expensive medicine (**Step 1**) before trying one that costs more (**Step 2**).
- Based on the results of **Step 1**, a **Step 2** medicine may be processed and covered.
- When you bring a prescription to your pharmacy, our system will automatically check to see if it meets the requirements for step therapy.
- If you have already filed pharmacy claims and they show you've tried a **Step 1** medicine that didn't work for you, the **Step 2** medicine may then be processed.
- But, if you have not recently tried a **Step 1** medicine, **the pharmacist will ask your doctor for more details**.

Always talk with your doctor about the choices you have for your treatments and medicines and check the Navitus app while you're at the doctor's office. That way, you will know whether a drug requires step therapy before you go to the pharmacy.

2 HOW TO USE YOUR BENEFITS

UNDERSTANDING HOW YOUR MEDICAL BENEFITS WORK

Benefit Plan Designs

Your employer offers specific plans, which you can see in the back pocket of this Guide.

The Most In-Network Doctors

TML Health medical plans utilize the Blue Cross and Blue Shield of Texas network.

Your best option is to always select an in-network healthcare provider or facility. This will not only save you money during the visit, but helps keep your premiums lower as well. If you use an out-of-network provider or facility, you may be responsible for paying the difference between the covered amount and the amount charged by the provider/facility. Some health plans may not offer coverage for out-of-network providers.

Find the Best Price

Get the same care at a lower out of pocket cost to you by comparing prices at the Blue Cross and Blue Shield of Texas website, using the Price Comparison Tool. Compare what you would pay out of pocket, with your specific plan, for more than 1600 procedures. Search by procedure or by provider.

Benefit Value Advisor (BVA)

As part of our commitment to bringing concierge service to our members, you will have 24/7 access to service through the Benefit Value Advisor program (BVA). Your Benefit Value Advisor can help you understand your benefits, find the best price on a procedure, and make, reschedule, or cancel appointments. If your doctor sets an imaging appointment for you, such as an MRI or CT scan, but you could get a better price elsewhere, your BVA will handle canceling your previous appointment and making the new one. Your calls will be kept right here in Texas, with Benefit Value Advisors in Marshall, TX.

Coinsurance DEFINITION

The percentage of a medical bill you pay once you've reached your deductible and your coverage has begun.

MEDICAL MANAGEMENT

TML Health's benefit plans include several programs designed to help you get the right care at the right price. Below is a summary of key programs we feel are important for you to know in order to understand how your plan works.

Wellbeing Management

Our holistic medical management program will give you a single point of contact, to help you treat your whole body, mind, and all your conditions in an integrated way, because you're a whole person, not a collection of parts with unconnected conditions.

24/7 Nurseline

A nurse at the 24-Hour Advisor Line can help you decide if you should call your doctor, visit the ER or urgent care, wait to see your doctor when you can, or treat the problem yourself. Services are available in many languages.

Teens can also call and speak to a nurse in private about teen health issues.

By calling this line, you can also listen to audio tapes on hundreds of health topics that may concern you, such as:

- Pregnancy
- Diabetes
- Children's health
- High blood pressure
- Insomnia
- Sexually transmitted diseases such as HIV/AIDS

24/7 Nurseline
877-351-8392
TTY: 800-386-4424

Well onTarget

Get 1-on-1 health coaching to help you meet your health and wellness goals like getting your blood pressure or glucose under control, getting fit, or managing your mental health.

To access your health coaching, enroll in the Well onTarget portal. You will then get a call from a health coach to find out more about your goals, your lifestyle, and set milestones to help you get to where you want to be. The coach will do 6-8 future calls with you to help support you on your health and wellness journey.

Prior Authorization

Some services covered under your medical plan may require an authorization before receiving services.

If you are using an in-network provider (doctor or facility), the in-network provider may obtain the prior authorization on your behalf. We recommend that you confirm with your provider that this has been done before you receive your treatment.

When Do I Need a Prior Authorization?

Services that may require a prior authorization include:

- Major imaging
- Joint and spine surgeries
- Genetic testing
- Radiation therapies

This list is just a sample, please refer to your Medical Benefits Booklet for the complete list of services that require Prior Authorization.

Specialty Review Unit

The Specialty Review Unit helps ensure that you are getting the right prescription, based on the latest research, the best dosage for you, and other factors. If they believe there is a better alternative, they will reach out to your medical provider to discuss your prescription.
