Service Highlights

- **Psychiatry:** Psychotherapy and mental health medication management, offering individualized care plans tailored to support emotional well-being and recovery. This service ensures ongoing monitoring and adjustments to help patients achieve optimal mental health outcomes.
- **Therapy and Counseling:** Therapy and counseling services from social workers and mental health psychologists, focusing on evidence-based practices to promote resilience and improve quality of life.
- **Intake & Assessment:** Behavioral health-focused assessment, including depression screening, to facilitate early detection and personalized interventions. These assessments are critical for identifying risk factors and providing timely support to mitigate potential crises.
- **Risk Stratification:** Analytics to identify those most at risk of behavioral health challenges to proactively engage and treat, enabling efficient allocation of resources for maximum impact.
